DETAILED ACTION

Allowable Subject Matter

Claims 1-35 are allowed.

The following is an examiner's statement of reasons for allowance:

The present invention is directed to a system for ensuring proper authorization by an entity before access to the information security system is granted to the entity. Each independent claim identifies the uniquely distinct feature of "communicating the entity identification data in clear text form along with encrypted data for evaluation by an initialization authentication unit." The communicated encrypted data is the entity identification data in encrypted form (see applicant's specification; page 6, lines 25-28). The closest prior art, Leibholz et al (US 4,783,798) discloses a conventional authentication system, in which only the encrypted form of the entity identification data is transmitted, fails to anticipate the above underlined limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
